PRESS RELEASE

of Dunkermotoren GmbH in April 2023

sps Italia - Italy's place to be for future-oriented industrial technologies

For industrial companies in Italy, the sps Italia in Parma is one of the most important trade fairs for intelligent, digital, and future-oriented technologies. Dunkermotoren and MAE have been exhibitors for many years and will, thus, appear together again this year in hall 5 at booth L005.

From May 23 to 25, 2023, the two drive technology manufacturers will present their highlights for the automation industry.

In line with the motto of the sps, Dunkermotoren will present its latest IIoT product "Smart Diagnostics" with its own IIoT brand nexofox. This innovation enables Dunkermotoren customers to choose from different packages depending on how many motors they want to monitor with Smart Diagnostics. This way, different features such as indications and alerts based on configurable thresholds can be used. At the booth in Hall 5 L005, the nexofox team will demonstrate live how this can work using a brushless motor with external electronics as well as a smart BG motor with integrated electronics.

In addition to the nexofox solutions, Dunkermotoren will also show a highly dynamic 4-axis handling system in Parma. The Gantry System consists of different linear modules, which provide visitors of the booth with small chocolate pieces. Gantry systems are used for many application areas from material handling to pick and place solutions, from liquids to solids.

MAE, headquartered in Italy, will present its reworked stepper motor portfolio in Parma. With gearboxes, encoders, brakes, and electronics from the Dunkermotoren portfolio, the steppers can be configured to a complete drive solution. New to the stepper motor portfolio is the STE series with the electronics already integrated. These are commissioned and programmed quickly and easily with the DWLoader commissioning tool. The stepper motors are controlled either via CANopen or EtherCAT.

AMETEK, Inc. is a leading global provider of industrial technology solutions serving a diverse set of attractive niche markets with annual sales over $6.0 billion.

Unlike many other manufacturers, MAE stepper motors are completely manufactured in Europe. Thus, they are quickly available even in small quantities.
